

BLEND AREA REFINISHING

OPTION 1:

- Step 1** Clean blend areas with R7K158 or SC155 Surface Cleaner.
- Step 2** Scuff sand using a gray nylon scuff pad along with USP90 Liquid Scuffing Gel.
- Step 3** Thoroughly rinse off the scuffing agent with clean water and completely dry the surface.
- Step 4** Re-clean the surface with R7K158 or SC155 Surface Cleaner.
- Step 5** Apply 1 medium wet coat of 2K S65 Basecoat Transparent / Adhesion Promoter. It is highly recommended that the S65 is used on high metallic / mica containing colors.

OPTION 2:

- Step 1** Clean blend areas with R7K158 or SC155 Surface Cleaner.
- Step 2** Sand the blend areas with P800 grit sandpaper. Thoroughly scuff unsanded areas with a gray nylon scuff pad. Then repeat above Steps 4 and 5.

I-CAR recommends following the paint manufacturer's recommendations for surface preparation, mixing, and application of automotive refinish products.
